

JEROW A. AMELO

Fourth-Year Computer Engineering Technology Undergraduate

La Carlota City, Negros Occidental, Philippines | +63 966-6736-308

jerowamelo11@gmail.com | github.com/Zek3zra | jerowamelo.vercel.app

EDUCATION

Technological University of the Philippines Visayas

Bachelor of Science in Engineering Technology

Major in Computer Engineering Technology | Fourth-Year Undergraduate

Relevant Coursework: Circuit Design, Electronics, Embedded Systems, Internet of Things (IoT), Machine Learning, Web Development

TECHNICAL SKILLS

Embedded Systems and IoT: ESP32, Arduino, sensor integration, real-time data collection, Wi-Fi communication

Programming: C/C++, Python, Java, basic SQL

Electronics: PCB design; schematic design and simulation (NI Multisim); circuit analysis; sensor interfacing and calibration

Web Development: HTML, CSS, JavaScript fundamentals, Git/GitHub

KEY PROJECTS

AquaWatch: Campus Water Dispenser Monitoring and Mapping System

ESP32, load cells, HX711, Wi-Fi, IoT, web technologies

- Interfaced an ESP32 with load cells and an HX711 module to measure weight and estimate water availability.
- Integrated calibration management, Wi-Fi transmission, and database logging for monitoring and refill planning.
- Built a real-time web dashboard with campus mapping to display dispenser status and water levels.

2-Bit Arithmetic Logic Unit (ALU)

7400-series logic ICs, logic gates, switches, four-LED output

- Built a logic-gate ALU using 7400-series ICs for addition, subtraction, multiplication, and division.
- Used switches to enter two 2-bit operands (0–3 each) and displayed arithmetic results using four output LEDs.

EXPERIENCE

Project-Based / Freelance

October 2025 - Present

Web and IoT Project Lead

- Developed a database-backed Lost and Found web application for structured item reporting, storage, and retrieval.
- Built a biometric attendance system linking fingerprint authentication to a web interface for real-time records.
- Built an Arduino fish dryer with a temperature sensor and keypad; used relays to control an incandescent heating bulb based on temperature and switch fans for airflow.

Adriano's

July 2025 - Present

Social Media Manager / Marketing Editor

- Create branded promotional content and analyze social and market trends to support marketing decisions.
- Manage customer orders and inquiries and coordinate requirements for timely, accurate service.

CERTIFICATIONS

International Certificate - Robotics Level 1
